

Reinventing the drug carrier

In **Italy** there are about 2000
nutraceutical companies
that could save
8.6 B€ yearly!

The **vast majority** of them use obsolete methods that **lack of efficiency**, due to:

High solvent
residue

The **vast majority** of them use obsolete methods that **lack of efficiency**, due to:

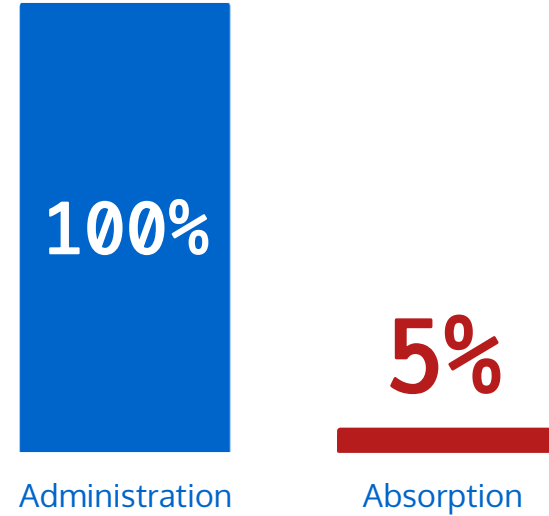

Several steps
of production

High solvent
residue

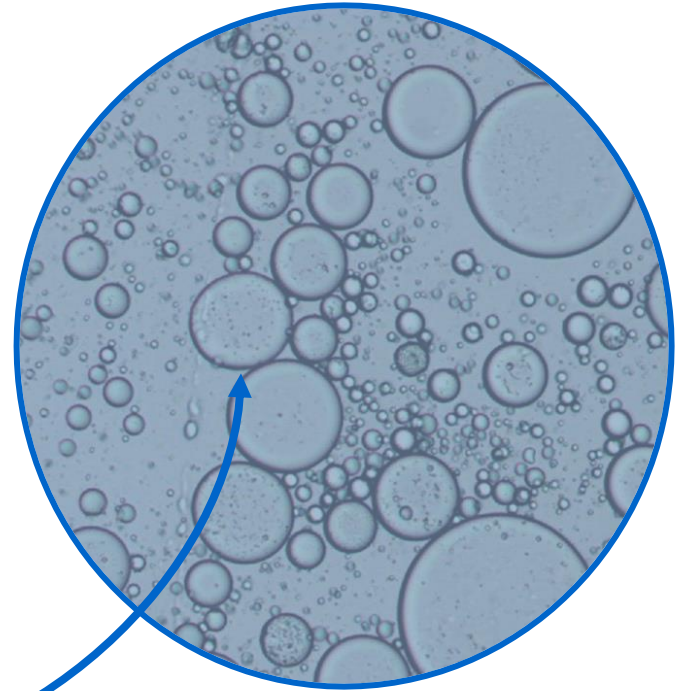

Low
sustainability

This leads to a **low bioavailability** of active ingredients

Active ingredients

To improve bioavailability we use
drug carriers
that protect, transport and
enhance the efficacy of the
encapsulated molecules

but not all drug
carriers are the same!

with **our** patented
technology
we managed to **solve**
all these drawbacks
